PROFESSIONAL SUMMARY

GenAI Engineer with **1.6+ years** of experience building **LLM-powered systems**, **multi-agent workflows**, and **AI microservices** for enterprise platforms. Focused on **RAG**, **vector databases**, and **LLM fine-tuning** to automate incident management and cut manual effort by **~90%**.

TECHNICAL SKILLS

- **Languages**: Python, Java, C, C++
- **GenAI & LLMs**: Prompt Engineering, RAG Pipelines, Embeddings, Multi-Agent Systems, Hybrid Search, MCP, LLM Evaluation (DeepEval), Fine-Tuning (PEFT/LoRA)
- **Frameworks**: LangChain, LangGraph, Hugging Face, PyTorch, TensorFlow, FastAPI, Flask
- **Data & Databases**: Milvus, FAISS, OpenSearch, DocumentDB, DynamoDB, Redis, Semantic Search, Knowledge Graphs, ETL Pipelines, MLOps, RapidOCR
- **Cloud & Tools**: AWS (ECS, EKS, S3, Bedrock), Docker, GitHub, Claude CLI, Dynatrace, Kibana, ServiceNow, Jira, Microsoft Teams, Azure DevOps, Copilot Studio, Twilio, REST APIs, Microservices, System Design, Agile

WORK EXPERIENCE

Software Engineer – AI/ML/GenAI | TCS | Chennai Feb 2025 – Present

- Led design of a **multi-agent GenAI platform** on **LangGraph** with **10+ MCP tools**, unifying ServiceNow and Jira and cutting incident processing time by **~90%**.
- Automated **5** incident lifecycle stages (creation, retrieval, updates, synchronization, resolution), eliminating manual hand-offs between **2** systems, ServiceNow and Jira.
- Built hybrid dense/sparse **RAG** on **Milvus** and **FAISS** across **1,000+ incidents** and runbooks, surfacing proven past fixes for new incidents.
- Added **3** LLM safeguards (prompt auditing, data validation, hallucination checks) to keep responses accurate, safe, and explainable.
- Shipped **3** microservices (RAG, embedding, knowledge ingestion) on **3** AWS services (ECS, EKS, Bedrock) using FastAPI and Docker.
- Tracked **3** LLM KPIs (token usage, latency, prompt quality) through observability dashboards, reducing inference costs by **15%**.
- Co-delivered the production deployment of the Contact Center multi-agent ServiceNow–Jira platform.

PROJECTS

ServiceNow–Jira Intelligent Automation Agent
Tech: LangGraph, Milvus, BM25, dense embeddings

- Developed an incident-to-Jira matching engine on **Milvus hybrid search** (dense embeddings + BM25), reaching **~85% accuracy** in finding relevant historical issues.
- Added attachment parsing and metadata filtering, so matches draw on **2** sources: ticket text and attached files.
- Designed multi-turn incident workflows with tool calling, cache-backed memory, and automated knowledge-base ingestion.

AI Agent – Microsoft Teams–ServiceNow Integration
Tech: Multi-agent GenAI, Microsoft Teams, ServiceNow

- Launched a **GenAI multi-agent graph** linking Microsoft Teams and ServiceNow, letting users raise incidents in natural language across **9+ enterprise applications**.
- Automated **Change Request (CR)** approvals for **9+ applications** (flight station changes, user-role updates), validating approval rules and prerequisites.
- Enforced **1** mandatory approval gate: backend changes run only after manager authorization.

Other Projects
Tech: Kibana, Dynatrace, Azure DevOps, Microsoft Copilot Studio, Twilio

- Devised an **AI-powered monitoring and alerting** solution on Kibana and Dynatrace, running **24-hour** scheduled log-processing jobs to detect recurring errors and production issues.
- Connected **Azure DevOps** with AI workflows to retrieve and analyze work-item data, enabling triggered issue analysis.
- Configured AI agents in **Microsoft Copilot Studio** and built a **Twilio** voice agent, covering **2** channels: text and voice.

CERTIFICATIONS

- **AWS Certified AI Practitioner** (Score: **763/1000**), AWS Certified Cloud Practitioner
- Claude Certified Developer, Claude Certified Architect – Foundations
- Infosys Springboard: Foundations of Artificial Intelligence (**90%**)

EDUCATION

- **Saranathan College of Engineering** (Bachelor in Computer Science and Engineering) | CGPA: **8.4/10** 2020 – 2024

ADDITIONAL

- Solved **250+ LeetCode** problems across arrays, strings, trees, graphs, and DP.
